

First World Problems

Cody W Brooks

I can see it all on your face
You're feeling crowded
Why don't we find a better
place
Cause I think we're
surrounded

By people with these first
world problems
Trying to fix those people
With those third world
problems
People with those third
world problems
Laughing at the people with
those
First World Problems
Let's get out of here
Ohh that's better

Ohh roll my window down

Ohh that's better

Damn I'm out of cigarettes

Pull in here and let's fill her
up

You rock the pumps and I'll
stand in line

The locals here are ready to
jump

Whispering the gossip of a
hen house kind

People with those small
town problems

Look at all these people
with these

Small town problems

People with the whole
sheep problem

Laughing at the cackle of a
Small town problem

Let's get out of here

Ohh that's better

Ohh roll my window down
Ohh that's better
Turn the radio on loud

Ohh that's better
Hey I like this song
Ohh that's better

Take a left at the first light
That was my ole buddy
Jimmy that called
We gonna get down tonight
Find a floor to dance it off

Hey Jimmy how you been
Man it's been one of those
days
Now don't start on that
again
Talking bout the shit that we
just escaped

People with these fucked up
problems
Look at all these people

with these

Fucked up problems

People always trying to
solve em

Look at all these people
with these

Fucked up problems

Let's get out of here

Ohh that's better

Ohh roll my window up

Ohh that's better

Hey let me tell you what

Why don't we just go home

I like it best when it just me
and you

All alone

Why don't we just go home

I tell you what, next time
you dress up

Let's just stay in

Why don't we just go home

Why don't we just go home
